PERFORMANCE DISPERSION WITHIN DEVELOPED MARKETS EUROPE

Performance	1M	3M	6M	12M	Top / Bottom	5%	10%	25%
Top 25%			695 stocks		max: +2052.01%	avg: +90.76%		
					min: +44.80%			
Mid 50%			1391 stocks			avg: +23.89%		
Bottom 25%			696 stocks		max: +7.13%	avg: -4.65%		
					min: -77.97%			

Average returns represent the dispersion of performance across Developed Markets: Europe over the last month. The greater the dispersion, the higher the potential to gain meaningful returns above the average return of the region. In periods of high dispersion, active managers have more opportunities to generate excess returns through positive stock selection.

About Trendrating

Trendrating is the leader in trend-capture models, analytics and technology, serving more than 100 clients worldwide, as well as premier partners such as Euronext and Bloomberg. We provide an innovative, well-validated set of analytics and proprietary technology to assess and rate the quality of price trends. The ability to capture trends, profiting from bull markets and avoiding bear phases, is the key to superior performance on a consistent basis. Our methodology makes it possible to quickly analyse and measure trends using a rating system, where **A** and **B** identify bull trends and **C** and **D** point to bear trends.

A = strong bull trend

B = beginning of a bull trend

C = inception of a bear trend

D = strong bear trend

Our approach captures medium- to long-term price trends in a systematic and unbiased way that can impact yearly portfolio returns. Importantly, the rating of trends provides additional market intelligence designed to support and enrich the investment decision process and maximize returns while improving risk control. With Trendrating, you can evaluate the direction and the quality of price trends for stocks, ETFs, indexes, sectors and regions. **Trendrating's solutions can be efficiently – and readily – integrated into most investment strategies and models.**
